

This document demonstrates few aspects of PDF/UA-2

- List items with labels
- Language changes
- External hyperlinks
- Internal hyperlinks (specifically [this one](#) which has a PDF2 "Ref" property)
- ActualText attributes
- Text decoration attributes
- Namespaces, including MathML, and complicated RoleMaps (there are two HTML namespaces, to allow us to map the <a> element to both PDF1's Reference *and* PDF2's Link as required in PDF/UA-2)
- Page number artifacts, and PageLabels that match
- Images

Some ~~*muy difficile*~~ equations

e. The [quadratic equation](#) is $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$

f. The [gamma function](#) is $\Gamma(t) = \int_0^{+\infty} x^{t-1} e^{-x} dx$

Here is a picture of a pony:
